The District will provide meal service chosen from a District determined menu. District will use Artist's contract rider as a guide, but will be the final determiner of the meal that is served. Accommodations will be made for vegetarian meals upon request. Additional food and beverage service (i.e. tour bus food service) may be requested by the Artist at the Artist's expense from the on-site caterer. Catering itself will be capped at \$3,000.00 versus the cost of Artist's touring personnel staff for meals and dressing room riders, whichever is lower. After show food and bus stock is not provided. The District will not provide alcoholic beverages and/or tobacco products as a part of this agreement.

Unless contracted, costs associated with the tour itself, including, but not limited to such items as hotel accommodations, travel fares, ground transportation, freight costs and backline are the financial responsibility of the Contractor.

Unless contracted, personal Contractor needs, including, but not limited to such items as massage, health care professionals and hairstylists are the financial responsibility of the Contractor. Runners are available on the performance day only and within a 15 mile radius.

CD sales will be subject to a 10% commission payable to the District. All merchandise sales are subject to these commission rates or as stated in the face of the Contract. Contractor will be responsible for paying sales tax and, in all instances, the foregoing split shall be paid after deduction of tax.

The District will provide adequate point(s) of sale. If the District is to provide individuals to handle sales transactions, notification to the District MUST be in advance or the District may be unable to provide individuals to handle the sales transactions. In addition to any commission due and owing to the District under the provisions of the Paragraph, Contractor is responsible for all salaries, fees, costs, and expenses incurred by the District in providing personnel responsible for the merchandising sales transaction.

SPONSORSHIPS

District sponsorships shall not be excluded by Artist/Contractor's sponsorship commitments. District sponsor signage shall be used throughout the venue. District agrees the signage for District's sponsors will not imply Artist/Contractor endorses the sponsor, its products, or services. Artist/Contractor shall not receive any revenues from any District sponsorship agreements. Artists/Contractor's sponsorship signage may be used only upon the prior written consent of the District, not to be unreasonably withheld. Each party shall notify the other party of any potential conflicts related to sponsorships to the extent it is made aware.

The District will provide meal service chosen from a District determined menu. District will use Artist's contract rider as a guide, but will be the final determiner of the meal that is served. Accommodations will be made for vegetarian meals upon request. Additional food and beverage service (i.e. tour bus food service) may be requested by the Artist at the Artist's expense from the on-site caterer. Catering itself will be capped at \$3,000.00 versus the cost of Artist's touring personnel staff for meals and dressing room riders, whichever is lower. After show food and bus stock is not provided. The District will not provide alcoholic beverages and/or tobacco products as a part of this agreement.

Unless contracted, costs associated with the tour itself, including, but not limited to such items as hotel accommodations, travel fares, ground transportation, freight costs and backline are the financial responsibility of the Contractor.

Unless contracted, personal Contractor needs, including, but not limited to such items as massage, health care professionals and hairstylists are the financial responsibility of the Contractor. Runners are available on the performance day only and within a 15 mile radius.

MERCHANDISING

All merchandise sales are subject to a commission payable to the District. In the event any merchandise will be sold, please contact the District's Production Office. The Artist/Contractor shall provide the District with advance notification of Artist/Contractor's intent to sell merchandise. Unless otherwise indicated on the Contract face page, merchandising sales are subject to 70%/30% split with the venue selling the merchandise. CD sales will be subject to a 10% commission payable to the District. All merchandise sales are subject to these commission rates or as stated in the face of the Contract. Contractor will be responsible for paying sales tax and, in all instances, the foregoing split shall be paid after deduction of tax.

The District will provide adequate point(s) of sale. If the District is to provide individuals to handle sales transactions, notification to the District MUST be in advance or the District may be unable to provide individuals to handle the sales transactions. In addition to any commission due and owing to the District under the provisions of the Paragraph, Contractor is responsible for all salaries, fees, costs, and expenses incurred by the District in providing personnel responsible for the merchandising sales transaction.

SPONSORSHIPS

District sponsorships shall not be excluded by Artist/Contractor's sponsorship commitments. District sponsor signage shall be used throughout the venue. District agrees the signage for District's sponsors will not imply Artist/Contractor endorses the sponsor, its products, or services. Artist/Contractor shall not receive any revenues from any District sponsorship agreements. Artists/Contractor's sponsorship signage may be used only upon the prior written consent of the District, not to be unreasonably withheld. Each party shall notify the other party of any potential conflicts related to sponsorships to the extent it is made aware.

EXHIBIT E – PACIFIC AMPHITHEATRE HOUSE RIDER / PERFORMANCE AGREEMENT (CONT.)

MISCELLANEOUS

The performance may be emceed (i.e. "welcomed by") a local market radio station personality, which shall be selected by the District; however, upon request, Artist shall have the right to pre-approve any references to be made with respect to Artist. In no way shall this be considered a "co-promotion" or "presented by" situation. The Contractor will be informed of the station selected prior to the engagement.

PROMOTIONAL MATERIAL AND ADVERTISING

Contractor shall use Contractor's best efforts to provide materials, including biographical information and photographs, to the District for use in District's promotional and advertising material.

DRUGS & PARAPHERNALIA

Artist/Contractor shall not receive any revenues from any District sponsorship agreements. Artists/Contractor's sponsorship signage may be used only upon the prior written consent of the District, not to be unreasonably withheld. Each party shall notify the other party of any potential conflicts related to sponsorships to the extent it is made aware.

District sponsorships shall not be excluded by Artist/Contractor's sponsorship commitments. District sponsor signage shall be used throughout the venue. District agrees the signage for District's sponsors will not imply Artist/Contractor endorses the sponsor, its products, or services. Artist/Contractor shall not receive any revenues from any District sponsorship agreements. Artists/Contractor's sponsorship signage may be used only upon the prior written consent of the District, not to be unreasonably withheld. Each party shall notify the other party of any potential conflicts related to sponsorships to the extent it is made aware.

The contractor/renter's insurance coverage shall be primary and any separate coverage or protection available to the fair or any other additional insured shall be secondary.

SPONSORSHIPS

District sponsorships shall not be excluded by Artist/Contractor's sponsorship commitments. District sponsor signage shall be used throughout the venue. District agrees the signage for District's sponsors will not imply Artist/Contractor endorses the sponsor, its products, or services. Artist/Contractor shall not receive any revenues from any District sponsorship agreements. Artists/Contractor's sponsorship signage may be used only upon the prior written consent of the District, not to be unreasonably withheld. Each party shall notify the other party of any potential conflicts related to sponsorships to the extent it is made aware.

In no way shall this be considered a "co-promotion" or "presented by" situation. The Contractor will be informed of the station selected prior to the engagement.

PROMOTIONAL MATERIAL AND ADVERTISING

Contractor shall use Contractor's best efforts to provide materials, including biographical information and photographs, to the District for use in District's promotional and advertising material.

SUBJECT: High Profile Event Policies

DATE: September 16, 2016

FROM: Kathy Kramer, CEO

PRESENTATION BY: Kathy Kramer, CEO

RECOMMENDATION

Review and approve new booking policies for high profile events.

BACKGROUND

As OCFEC continues to grow the year round event business, there is more interest in our venues, specifically the Pacific Amphitheatre, for larger high profile events or larger all grounds events that could have a potential impact in the surrounding neighborhood. Staff has developed some new booking policies which will provide guidelines for managing our facilities as they relate to high profile events as well as ensure we are collaborating with all our partners in the planning process.

Developing these new booking policies was a collaborative effort with OCFEC's staff and the Tenant Liaison Committee as well as other stakeholders, including the City of Costa Mesa.

See attached document – High Profile Event Policies

NEW EVENT POLICY RECOMMENDATION 6/2016

High Profile Events

This policy governs High Profile Events at the OC Fair & Event Center (OCFEC). A High Profile Event is defined as an event that meets one or more of the following criteria, as determined by OCFEC in its sole and absolute discretion:

- The event has the potential to have a significant impact on the surrounding neighborhoods, including but not limited to noise, lighting, traffic congestion, and public safety.
- The complex nature of the event may impede operational event execution including, without limitation, effective crowd control and public safety measures.

In order to allow the OCFEC adequate time to assess and plan for High Profile events, the following policy will be implemented:

1. OCFEC must have at least seven (7) business days notice prior to the High Profile Event to adequately assess and plan the event, and coordinate with all relevant internal operations functions and appropriate external partners. The assessment process will include the same considerations as with all other events, including:
 - a. Available space – Is the desired space available without negatively impacting other users/uses of the property?
 - b. Available dates – Is the desired date(s) available without negatively impacting other users/uses of the property?
 - c. Scope of High Profile Event– Can the event be supported by available infrastructure and operational resources, and is it within the mission and values of OCFEC?
 - d. Competing events – Does the event compete with a similar or like event within the date range designated in the Competing Events Policy?
 - e. Safety concerns – Are there any safety risks and liabilities that may be caused by the event? If so, are such risks manageable?
 - f. Renter experience – What is the event experience desired by Renter?
 - g. Venue references – What is the past experience of the Renter’s event at other venues?
 - h. Bank and financial institutions references – provide three current references.
 - i. Provide three venue references in which renter has held previous events and if possible, references for events similar in size and scope to current event being considered by OCFEC.
 - j. High Profile Event business plan – What is the Renter’s proposed business plan for the event?
 - k. Financial return to OCFEC – What is the proposed net financial gain from the event?

2. Before an OCFEC contract for a High Profile Event is executed, OCFEC staff and CEO, along with Renter's representative(s) if applicable, will meet with area stakeholders including, but not limited to, the Chair and Vice-Chair of the OCFEC Board of Directors, the City of Costa Mesa, the Costa Mesa Police Department, Cal Fire, the OC Sheriff's Department, Orange Coast College, Vanguard University, and the Newport Mesa School District to discuss and assess the potential impact on the surrounding neighborhoods.
3. The Renter is required to pay 100% of the estimated event expenses, including the facility rental, in advance via certified check or wire transfer.
4. A security plan for the High Profile Event will be developed by OCFEC staff in conjunction with area law enforcement. The Renter must approve the security plan, agree and pay in advance the full costs associated with this plan to all appropriate agencies involved in providing services to the event, including OCFEC. Satisfactory payment arrangements must be made directly with the security/third party vendor before an OCFEC contract will be executed.
5. The Renter is required to provide an additional payment in the form of a minimum deposit of 50% of the total estimated event expenses to cover any additional costs that may be incurred as a result of the event. A certified check or credit card is required for this deposit and must be submitted 24 hours prior to the start of the event. If a credit card is presented as payment for this deposit, 50% of the total estimated costs will be charged to the credit card 24 hours prior to the start of the event. Within five business days of the conclusion of the event, OCFEC staff will present the Renter with a final event expense invoice and refund any overages.
6. The Renter may not issue tickets, vouchers or passes to the event (whether paid or complimentary) in excess of the State Fire Marshal's maximum capacity for the venue.
7. Due to the nature of High Profile events and the potential risk for OCFEC and surrounding areas, the Renter must provide a certificate of insurance for an amount not less than \$2 million in general liability coverage per occurrence. Upon concluding a risk assessment, OCFEC in its sole and absolute discretion reserves the right to increase the general liability coverage in an amount determined over the \$2 million minimum requirement.
8. Once the High Profile Event contract is signed, OCFEC will immediately begin communicating through a variety of channels to the public, stakeholders and surrounding neighbors regarding the event.

SUBJECT: 2016 Annual Fair Sound Mitigation Results

DATE: September 16, 2016

FROM: Ken Karns, VP - Operations

PRESENTATION BY: Jason Jacobsen, Director of Technology & Production

RECOMMENDATION

Information item only.

BACKGROUND

In 2015 the OC Fair & Event Center undertook sound mitigation initiatives in the new Pacific Amphitheatre layout along with the rest of the on-grounds entertainment areas with Sound Media Fusion (SMF). All reports indicated full compliance.

In 2016 Jason Jacobsen and Gary Hardsisty, Director – Sound Media Fusion, continued with sound mitigation efforts and ongoing improvements were made. A pre-Fair plan was proposed by SMF, which included adding weather information gathering equipment.

In the attached Executive Summary all reports once again indicate, full compliance during the 2016 OC Fair.

NOISE MITIGATION AND ACOUSTIC DESIGN/OPERATION- EXECUTIVE SUMMARY- FAIR 2016

SMF is very proud to have served as the acoustic, sound design and noise mitigation experts for the 2016 OC Fair season, marking our 13th year of successful contribution.

Refer to the SMF 2016 OC Fair sound mitigation and monitoring plan for details and methodology.

The OC Fair/Pacific Amphitheatre (Pac Amp) 2016 season featured four Pac Amp concerts prior to Fair and 23 events during Fair.

Some 181,000 people attended the shows in Pac Amp.

This year marked the second successful year of use of the SMF designed acoustic systems in Pac Amp (berm, lobby, rear seating area mitigation and others).

We continue to study and improve the Pac Amp mitigation/performance and, this year, we operated at higher sound levels within the venue compared to previous years (as a result of the combination of all we did).

As a result of higher in-venue operating levels, we received fewer challenges from visiting engineers and better venue coverage.

No complaints regarding audio were received from Pac Amp patrons.

This season also featured newly implemented means of acoustic control through electro-acoustic and passive means, utilizing the full features of the new acoustic design within and outside of Pac Amp.

The overall SMF noise masking and energy steering protocols, some of which were used for the first time this year, allowed for a less obtrusive level of overall Fair property noise into housing areas.

On going research by SMF will enable areas such as the ASA to operate with less coherent noise in the housing areas. Some of the methods contemplated will be used for the Fair 2017 season.

SMF will supply a full wrap-up report for our activities this year, at a later date. The detail report will include recommendations for improvement and recommendations for moving forward to Fair 2017.

SMF obtained housing area data, for the purposes of mitigation and on-going study, from:

1. Fixed sound monitoring locations in two primary locations (a third was added during the last week of the Fair). Data was recorded during the entire duration of each Pac Amp concert (with some minor exceptions).
2. Portable monitoring system used at random locations and times.
3. Audio recording in each fixed location, running for the duration of the log times.
4. Fair employees, located in the fixed monitoring areas, hand written logs which included notes detailing local environmental noise contributions.
5. Weather monitor station (this data was helpful this season and will be used as part of our overall, on-going study of our noise mitigation protocol and method).

SMF supplied detailed reports following each show and the reports indicated good compliance at all times. Note that the log data contained in the reports includes, at times, significant environmental noise (planes, cars, baseball games, others), as well as overall Fair ambient noise.

SMF success this season included successful mitigation:

1. No complaints were received from any of the housing areas.
2. Very little noise was heard in the housing areas from the Fair property, including Pac Amp, and all noise was of a low level, non-disturbing character.
3. Very little interference was noted from any one Fair venue to any other Fair venue containing amplified sound.
4. We were in legal compliance in the fixed monitoring locations in the housing areas and in all areas randomly selected via SMF portable monitoring (note that report data includes all contributions including Fair noise and environmental noise).

Fixed monitoring locations:

-Mesa Del Mar Tewinkle Park area X 2 (the second location was added during the last week of the Fair).

-College Park housing area

The picture below shows the approximate locations we used in Tewinkle park in the Mesa Del Mar area:

As is typical for all amplified events on the property, proper mitigation and monitoring requires an expert to understand the problems and how to mitigate them...it's NOT simply a matter of turning something down. It involves proper sound system tuning and use, understanding of local acoustics and technical discussion and direction. It also involves helping to educate, rather than simply confront, visiting engineers, in order to gain trust, understanding and proper cooperation.

Note that the methods and means described throughout all reports and documents submitted by SMF over the last three years includes the use of several SMF proprietary techniques, SMF owned trade secrets, as a broad class of acoustic and electro-acoustic control (such ideas and methodology are unique as separate means and in combination, as used by SMF to reduce property noise, reduce interference between venues, and to allow Pac Amp to operate at higher, more enjoyable venue levels, while still meeting the goals of compliance and mitigation in all housing areas- even with a large variety of music).

SUBJECT: Approval to Develop a Scope of Work, Construction Specifications and a Budget for the Agricultural Workers Memorial Rebuild

DATE: September 16, 2016

FROM: Ken Karns, VP - Operations

PRESENTATION BY: Ken Karns, VP - Operations

RECOMMENDATION

Approve up to \$27,500 to work with CF FA to develop a scope of work, construction specifications, a construction budget and prepare a bid package to rebuild the Agricultural Workers Memorial.

BACKGROUND

In 2012, under the direction of the Board of Directors, the OC Fair & Event Center started a process to develop an art project to honor agricultural workers in Orange County.

The project was not completed as intended, and due to workmanship and structural issues, the project was halted. The area was deemed unsafe for public use and as such was fenced off as reported in updates at the May 2016 Board of Directors meeting.

Staff was instructed by the Board to investigate how to best proceed to create the Agricultural Workers Memorial under normal construction processes.

Through reviews with CFFA and the Workers Memorial Task Force, staff and the committee have developed a plan to move forward with the next step in the project.

For an amount not to exceed \$27,500 staff will work with CFFA to develop a scope of work, construction specifications, a construction budget and have a bid package prepared.

RE: Master Site Plan Consultation – RFP Number MS-12-16

Dear Members of the Selection Committee:

Johnson Consulting, Inc. (Johnson Consulting), in partnership with **HPI Architecture** and **SWA**, is pleased to submit this proposal to the 32nd District Agricultural Association for Master Site Plan Consultation. We assembled our team to provide national and local expertise in fairgrounds economics, facility analysis and budgeting, planning, and community outreach. Johnson Consulting is the top economic consultant for fairgrounds in the U.S. We recently completed an economic evaluation of the Del Mar Fairgrounds and are currently working with SWA on the Santa Clara County fairgrounds in San Jose, California. HPI Architecture will strengthen our team's local knowledge, as they are working on several parcels right next to your fairgrounds, and provide efficient access for community outreach.

Fairgrounds do not die easily. And well they shouldn't. The heritage of agriculture and memories of times past can play a key role in supporting healthy communities. However, these traditions and places must also be re-envisioned in order to offer modern facilities, identify best uses of significant large tracts of land, and create beloved destinations that will endure and thrive into the future.

As we understand it, the 32nd District Agricultural Association is seeking a team to provide a common and agreed upon foundation of data and information associated with Fair operations, development potential of the existing site, and relative economic benefit of alternatives. **We are that team** because we understand the balancing act required for accomplishing the guiding principles for revitalization of the Fairgrounds, including a transparent and inclusive process that maximizes opportunities for economic growth, engages the community's hopes and aspirations, and provide for efficient phasing and site utilization.

We have built our team around trusted, experienced and highly knowledgeable individuals who can deliver the impartial, thorough assessment and recommendations needed for immediate decisions without having to wait for the next phase of work or next consulting effort.

*Submission of this proposal signifies that all terms, conditions, requirements, protest procedures, performance measures and instructions concerning the award of the **RFP #: MS-12-16** to which this proposal responds, have been read and understood.*

Further, in signing this letter, as the authorized representative of the submitting Bidder, it is expressly agreed by the Bidder that failure to have provided accurate and truthful information in this proposal or any deviation from any requirement or performance measure stated in the RFP shall constitute grounds for rejection of this proposal. And further, Bidder agrees that if the submitted proposal is not in the format of the RFP, Bidder's proposal will be deemed non-responsive.

I will serve as the point of contact for our team. My information is as follows:

JOHNSON CONSULTING

Johnson Consulting, Inc. is a corporation founded in 1996 in Chicago, Illinois. Since inception 20 years ago, our firm has conducted hundreds of engagements throughout the U.S. and internationally with a focus on the development of fairgrounds, public assembly facilities, hotels and surrounding districts, urban renewal districts, and the broader real estate markets. The majority of this work is focused on planning, market and feasibility studies, economic and fiscal impact assessments, economic development, strategy development, tax analysis and projections, site selection, development consulting, developer and investor recruitment, as well as downtown and suburban development and redevelopment planning. Our expertise allows us to counsel clients on whether development is appropriate, and if so, what should be built, where it should be built, and how to finance and develop the project. Johnson Consulting is noted for providing straightforward opinions and will say ‘no’ if the project does not make sense.

SANTA CLARA COUNTY FAIRGROUNDS | SANTA CLARA, CALIFORNIA

Johnson Consulting in partnership with SWA, Group 4 Architects, and Economic & Planning Systems, and supported by a technical team of historic preservation architects, civil engineers, and environmental, sustainability, and transport consultants, were retained by Santa Clara County to provide consulting services in relation to fairgrounds operations, land economics, and land use planning. The Santa Clara County Fairgrounds occupy 150 acres in southeast San Jose. While a portion of the site has been repurposed for residential uses, overall the site is underutilized, vacant, or used only for temporary purposes. In recent years, there have been multiple efforts focused on the revitalization of the Fairgrounds. The key objective of our study was to provide a common and agreed upon foundation of data and information associated with Fair operations, development potential of the existing site, and relative economic benefits of alternatives. Our study culminated in a comprehensive options assessment that reflected a thorough process of indusionary input from community stakeholders. **Johnson Consulting Team Members/Roles:** Charles Johnson-Project Executive and Project Manager; Ryan Johnson-Market and Economic Analysis; Sarah Emmerton-Financial Projections

WESTWORLD ECONOMIC IMPACT ANALYSIS | SCOTTSDALE, ARIZONA

The City of Scottsdale engaged Johnson Consulting to provide an analysis regarding the economic impact of events at held at the WestWorld property. Specifically, Johnson Consulting analyzed all of the economic impacts generated from event activity at WestWorld, as well as conduct surveys of patron and exhibitors from the four “signature events.” The analysis was very important in communicating the impact the loss (or gain) of a signature event may have on WestWorld.

WestWorld is a nationally recognized equestrian center and special event facility, located in Scottsdale, drawing visitors from throughout the metro area, state, and region. The complex includes the 6,000+ seat Equidome, the 6,700+ seat Wendell Arena, other various smaller arenas, a 19-acre Polo Field, the 8,210-square foot Brett’s Barn, horse stalls, overnight RV facilities, and parking. The City of Scottsdale reacquired the management rights and assets to the facility in January 1997. As a high-profile events complex in a then growing market, WestWorld exhibited characteristics that indicated a substantive economic impact. **Johnson Consulting Team Members/Roles:** Charles Johnson-Project Executive and Project Manager

EDUCATIONAL AND AGRICULTURAL PAVILION | MOUNT PLEASANT, TEXAS

Johnson Consulting was retained by the City of Mount Pleasant and other stakeholders to undertake a market feasibility study pertaining to a proposed Educational and Agricultural Pavilion to be developed along Interstate Highway 30 in Mount Pleasant, Texas. The proposed \$65 million development will encompass 500,000 square feet of useable space, anchored by a fairgrounds and rodeo arena. A sports complex, focused on softball, will also be developed. The combination of these uses was on target with current and likely future industry trends at the time of our analysis and would create the critical mass to support an adjacent proposed waterpark, along with future multiple hotels and ancillary restaurant and retail space. The nexus of several equestrian-based industries, and a location within the heart of horse and sports country, make this a singularly unique environment. **Johnson Consulting Team Members/Roles:** Charles Johnson-Project Executive and Project Manager; Ryan Johnson-Operational Analysis; Sarah Emmerton-Research

DEL MAR FAIRGROUNDS/RACETRACK | DEL MAR, CALIFORNIA

Johnson Consulting and Economic & Planning Systems were retained by the 22nd District Agricultural Association (22nd DAA) to provide a comprehensive economic and fiscal impact analysis of the Del Mar Fairgrounds/Racetrack. The 340-acre Del Mar Fairgrounds is situated on the waterfront in north coastal San Diego County and owned and operated by the 22nd DAA, a State agency. The Fairgrounds hosts more than 300 events per year, including the County Fair and the popular Del Mar race meets, attracting more than 3 million visitors annually. Previous studies have demonstrated that the Del Mar Fairgrounds/Racetrack generates broad economic benefits to its neighboring communities and the region of approximately \$450 million per year while supporting approximately 5,000 permanent jobs. However, how those economic benefits are distributed to individual jurisdictions including Del Mar and Solana Beach and the extent to which there are public service costs incurred by the affected jurisdictions has not been robustly evaluated. Accordingly, the key focus of our study is identifying the costs and revenues generated by the Fairgrounds and how they are distributed to the cities of Del Mar and Solana Beach. In-person and online surveys of hundreds of event attendees, exhibitors, vendors, and promoters formed the basis of our economic and fiscal impact calculations. **Johnson Consulting Team Members/Roles:** Charles Johnson-Project Executive and Project Manager; Ryan Johnson-Market, Operations, and Economic Analysis; Sarah Emmerton-Research and Financial Projections

EXPO NEW MEXICO STATE FAIRGROUNDS | ALBUQUERQUE, NEW MEXICO

Johnson Consulting, in association with the Genesis Group, was engaged by the Department of Finance and Administration and the New Mexico State Fair to provide an analysis of the Expo New Mexico State Fairgrounds. The report included key findings and potential land planning scenarios for the existing Expo New Mexico facility, a new equestrian center, and additional commercial development.

The State of New Mexico was trying to address a capital improvement plan for the Expo New Mexico State Fairgrounds. The following questions were answered in our report: Can the Fairgrounds be improved at the existing site? Can a high quality Equestrian Center be accommodated on the site, while keeping and improving the fairgrounds? Can land area(s) be provided for commercial uses that can contribute to the improvement plan for the fairgrounds and Equestrian Center? Can enough resources be generated from a revised site plan to fully fund all aspects of the plan? The State of New Mexico accepted the findings of the land planning analysis and subsequently proceeded to implement Johnson Consulting's recommendations. **Johnson Consulting Team Members/Roles:** Charles Johnson-Project Executive and Project Manager; Ryan Johnson-Market and Economic Analysis; Sarah Emmerton-Research and Financial Projections

PROPOSED AGRI-BUSINESS EXPO CENTER | ST. JOSEPH, MISSOURI

Johnson Consulting was retained by the Buchanan County Agricultural Expo Center Board to prepare a facility feasibility study for a proposed Agri-Business Expo Center in St. Joseph, Missouri. The vision was to create a multi-purpose venue, focused on agriculture and education that will act as a catalyst for economic growth in the local and regional economies. The Center will become an integral part of the established animal health corridor that extends from Manhattan, Kansas to Columbia, Missouri, with St. Joseph already finding its niche in the animal health industry. The preliminary proposal included a 28,800 Expo Center, a 6,000-seat Arena, and over 600 portable stalls. Additional features of the proposal include trailer parking next to barns; RV camp sites with facilities; compost sales; nature trails; environmental studies; gasoline, diesel and convenience store; near shopping, restaurants, hotel/motels; City bus service; and green space.

Based on our assessment of the market opportunity for the proposed Expo Center, and analyses of competitive and comparable facilities, Johnson Consulting recommended that a larger Expo Center, incorporating a 50,000 square foot exhibition hall, could be supported within the proposed development. Following on from our market and feasibility analysis, the next phase of the project involved developing building concepts, determining probable costs and a development schedule, and preparing a needs assessment and implementation plan. Together, these two phases of this study provided a solid foundation for advancing the project from an idea to a business plan that can be implemented. **Johnson Consulting Team Members/Roles:** Charles Johnson-Project Executive and Project Manager; Ryan Johnson-Market and Economic Analysis; Sarah Emmerton-Financial Projections

NORCO SPORTS & EQUESTRIAN CENTER | NORCO, CALIFORNIA

Johnson Consulting was engaged by the City of Norco to prepare a preliminary market analysis for the Silverlakes Equestrian Park in Norco, California for a 122-acre development. The City proposed to develop the property into a premier equestrian and recreational facility through a public/private partnership. Johnson Consulting's work included the following: Market analysis and strategies; Site evaluation and comparable venues; Demand factors, including non-equestrian event; Competitive set and local market performance; and Hotel strategy and expenditure projections. Overall, the proposed development encompassed 45-acres of grass athletic fields, intended for high profile equestrian competition fields for national and international jumping, equestrian shows and double as a tournament venue for various super-regional sporting events. The development features eight synthetic grass athletic fields for both adult and youth soccer leagues and tournaments. A retail and hotel commercial area was also proposed for the site. **Johnson Consulting Team Members/Roles:** Charles Johnson-Project Executive and Project Manager; Ryan Johnson-Market and Economic Analysis; Sarah Emmerton-Financial Projections

COLORADO STATE FAIR | PUEBLO, COLORADO

Johnson Consulting was retained to provide an independent review and assessment of management and performance of the Colorado State Fairgrounds. The 102-acre Fairgrounds is owned by the State of Colorado and operated by the Colorado State Fair Authority, which is tasked with producing the annual Colorado State Fair – an 11-day event that attracts around 500,000 visitors each year – and is also responsible for year-round operations of the Fairgrounds. The site is improved with 57 buildings, a number of which are available for rent outside of the Fair. It is this year-round incremental utilization of the Fairgrounds, and associated revenues and expenses that is the focus of our study. Fairgrounds must be able to adapt to become more “modern”, being respectful of their heritage but also capable of embracing broader markets and urban populations. Revenues from the successful and profitable Fair are used to support year-round operations of the Fairgrounds. The Fairgrounds receives some State and local funding, although the amount of this funding has been sizably reduced in recent years. The Authority appointed a new General Manager, ideally positioning it to review historic operations and define a clear direction for the future of the Fairgrounds. Our report served to define strategies to assist the Fairgrounds in moving towards a breakeven operation on a year-round basis. **Johnson Consulting Team Members/Roles:** Charles Johnson-Project Executive; Ryan Johnson-Market and Economic Analysis; Sarah Emmerton-Financial Projections

SWA provided master planning and place-making concepts for transformation of the 155-acre Santa Clara County Fairgrounds into a mixed-use neighborhood that will serve as a destination for the larger San Jose and Santa Clara County communities. Working as part of a multi-disciplinary team, we analyzed existing conditions, evaluated technical and operational issues, and developed a range of program options that balance parks and amenities with fairgrounds event space and commercial, entertainment, housing, and other revenue-generating uses. Directing a multi-disciplinary team of economists, engineers, and architects, SWA developed the team's original Solano360 Vision Plan into a comprehensive specific plan document addressing land use, infrastructure, phasing, and implementation for an entertainment-oriented, mixed-use development. The plan focuses on a central creek park and entry street while emphasizing sustainable design and water management to restore habitat and solve area-wide flooding problems. A revitalized "Fair of the Future" continues the 60-year tradition of the Solano County Fair with a new world-class exposition hall, demonstration farm, event lawn, and flexible open space. SWA Scope: Mixed Use Master Planning; Conceptual Design; Policy Development; Civic Engagement. Key project personnel: Elizabeth Shreeve

Gardens,

fountain, outdoor stage, and multipurpose lawn offer opportunities for distinct and varied activities.

The design supports a strong connection to nearby buildings, including a new TV station, museum spaces, artist studios, and a local theater. Green design approaches included repurposing the loading dock for a multi-purpose pavilion with a solar roof. Supported by public-private funding as well as ARRA and State Energy grants, the grid of 500-foot deep geothermal wells will provide heating and cooling for adjacent buildings, offsetting the need for traditional energy sources. SWA Scope: Master Planning; Landscape Architectural Design; Civic Engagement. Key project personnel: Elizabeth Shreeve

WORK PLAN

Our Team’s Work Plan will provide the global assessment, critical information and input for long- and short-term decision-making by the Board of Directors of the 32nd District Agricultural Association (“District” or “Client”). Developing a Strategic Plan and Master Site Plan (MSP) for a major civic asset like the OC Fair and Event Center (“OCFEC”) demands a highly collaborative process, requiring a significant time commitment and input from a variety of constituent groups.

Our team, led by fairground and real estate economic experts, brings a strategic, creative, multi-disciplinary team to produce a comprehensive vision incorporating facilities analysis, listening-based community outreach, and environmentally sensitive master plan solutions. Consistent with the RFP, our Work Plan will create a Strategic Plan and Master Site Plan within a spirit of inclusion. Based upon the tasks set forth in the RFP, our work will encompass the following elements:

1. Project Initiation & Existing Conditions Review,
2. Facilitation of Internal Stakeholder Assessment Sessions,
3. Facilitation of Inclusionary Community Involvement,
4. Definition and Evaluation of OCFEC Operations and Needs,
5. Vetting of Business Opportunities,
6. Strategic Plan Development,
7. Finance Plan & Projections,
8. Master Site Plan Development, and
9. Economic & Fiscal Impact Analysis

Our methodology for each of these tasks and corresponding deliverables is described in detail as follows.

TASK 1 – PROJECT INITIATION & EXISTING CONDITIONS REVIEW

TASK 1.1 – PROJECT DEFINITION

The Consulting Team will meet with District Representatives to expand on and prioritize the assembled groups’ stated key goals and objectives, develop clear lines of communication, gather related documents, review project methodology, and conduct initial fieldwork. Tasks to be performed include:

PROPOSAL AND ATTACHMENTS – TECHNICAL

Work Plan, Approach, Methodology, Availability

- Gather, review, evaluate, and organize existing background information related to the project, including prior research and analyses that have been conducted by, or for, the Client, so as to understand current plans for development as well as constraints present on the site and the history of planning initiatives for the OCFEC. Documents to be gathered include the existing Master Plan and EIR (2003), the Organizational Needs Assessment (2014), and other site plans, title reports, engineering and soils reports, traffic studies, development proposals, and City of Costa Mesa zoning and permitting processes.
- Refine a Community Outreach Strategy with the Client, making best use of the SWOT analyses conducted as part of the Organizational Needs Assessment and input received during previous community engagement. The purpose of this task is to establish dates and content for workshop/exercises with internal and community stakeholders. See Task 3.1.
- Identify appropriate contacts and resources necessary to ensure complete review and assessment of issues and specific data.
- Establish deadlines for deliverables, presentations, and regular updates on the progress of the research and planning.
- Meet with and interview the OC Fair and Event Center Manager to discuss the venue's history, achievements, issues, and goals.
- Inventory the meetings, event, and hotel offerings in the area.
- Tour the OCFEC and surrounding area and assess natural factors (topography and drainage patterns; trees cover and vegetation; and sensitive environmental factors) and planning/social factors (zoning, easements, and special districts; neighborhood context; parcel configurations and relationships to surroundings; access and site circulation; existing development including facilities and outdoor uses; visual character; utility corridors and constraints; and recreation and open space issues).
- Summarize significant data from the above to indicate the development, landscape and environmental opportunities and limitations of the OCFEC property.
- As appropriate, meet with representatives from the various agencies with jurisdiction to gain information on critical environmental and historical issues and other requirements that could impact future project schedules and work products.

TASK 1.2 – ASSESSMENT OF EXISTING CONDITIONS AND CAPACITY REVIEW

The Team will inventory and assess the condition of all facilities currently located at the OCFEC in order to identify unmet needs, facilities that have become non-competitive, and, ultimately, the opportunity that may exist for new or upgraded facility offerings. Among the factors to be considered:

- Current conditions and functionality of existing facilities, including indoor and outdoor spaces. This will include a high level visual inspection of existing buildings and review of information provided by the Client.
- Current operations and finances, organizational structure, existing tenancies, contracts and obligations.
- Historical overall utilization of the OCFEC, including the number and type of events, attendance, satisfaction of users, lost business, impact to community.
- Current programming and relative level of events at the facilities versus other comparable facilities and/or expectation, marketing and promotion initiatives.
- Historical finances, profit and loss statements, required funding subsidies, and sources of revenues that have been used to pay for operations and capital costs.
- Public support, operating and/ or otherwise.

As it relates to the broader market and to focus in on opportunities and needs for fairgrounds' facilities and uses on the current site, we will provide an analysis of conditions such as:

- Economic impact of the OCFEC on the City of Costa Mesa and the State of California, if appropriate for grant requests.
- Population, demographics, household income and other characteristics of Orange County that are relevant to the successful operations of the OCFEC and other events and activities within potential market areas.
- Orange County's existing position in the state, regional, and national agricultural markets and its ability to expand its event and general tourism markets, translated into a realistic assessment of the County's strengths, weaknesses, opportunities, and threats.

TASK 1.4 – PREPARE REPORT DELIVERABLE

At the conclusion of this task, we will provide summary notes and an Existing Conditions Report to the MSP Committee and Executive Management Team for their review and distribution to other Stakeholders, as appropriate.

Completion dates: 6 weeks from Authorization to Proceed

TASK 2 – FACILITATION OF INTERNAL STAKEHOLDER ASSESSMENT SESSIONS**TASK 2.1 – INTERNAL STAKEHOLDER WORKSHOPS**

Our approach to facilitating the Internal Stakeholders participation will be accomplished by the following tasks.

- Work sessions and brainstorming exercises using planning tools that enable participation both in the sharing and assessment of the stated needs, wants and priorities of the OCFEC,
- Small focused interviews with Internal Shareholders to gather information/ data,
- A series of regularly scheduled meetings with the MSP Committee, Executive Management Team and other Internal Stakeholders to confirm goals, objectives and principles for the project; review initial findings and the observations; and vet planning concepts and alternatives as they evolve,
- Regular progress reporting by the Consulting Team on all aspects of intermittent progress, final findings, and evolving considerations and recommendations throughout the process.
- Written updates, as appropriate.

TASK 2.2 – PREPARE REPORT DELIVERABLE

We will prepare a detailed Internal Stakeholders Needs & Wants Assessment Report based on the input from the numerous Internal Shareholders' workshops and meetings for feedback, discussion and revision, as requested. The report will emphasize utilization of the internal assessment into overall planning of the OCFEC Board of Directors.

Completion dates: January 16, 2017; Board of Directors Presentation—January 27, 2017

TASK 3 – FACILITATION OF INCLUSIONARY COMMUNITY INVOLVEMENT

TASK 3.1 – DEFINE INCLUSIONARY PROCESS FOR COMMUNITY INVOLVEMENT

An effective interactive process must include not only listening and fair consideration of ideas and opinions, but also communicating back what was heard. Our participation methodology for the project involves the following steps: four (4) days maximum of community workshops (and/or a series of smaller group meetings with several interest groups) during the process in order to solicit input and feedback; build understanding and support for the Plan recommendations; and strengthen the relationships and partnerships that will successfully carry the project forward through implementation. Our four community outreach and stakeholder sessions will be conducted as follows:

- At this initial workshop day, our team will provide an orientation of the project background and process, including a summary of existing facilities inventory and site analyses, and select examples of comparable projects where we have worked. We will solicit input on the community's values, which will be incorporated into the criteria used to evaluate options as they are developed. We will also ask about the community's needs, wants and priorities for current and potential future activities and amenities at the OCFEC.
- Following initial development of OCFEC Master Site Plan studies, we will report back on options for the future planning of the OCFEC and the next steps in the planning and implementation process. At this time we will seek additional community input on the planning options.

- Following further revision and development of OCFEC Master Site Plan studies, we will report back on the highest-ranked option for the future planning of the OCFEC and the next steps in the planning and implementation process. At this time we will seek additional community input on this option.
- Once the master site plan is finalized, we will present the plan to the community.

We have used this strategy successfully to maximize outreach and input in other communities. Each iterative phase of the process will include one day-long multiple in-person event and communication formats including:

- Community and stakeholder workshops and focus groups;
- Drop-in open houses, scheduled in conjunction with and directly preceding the town hall meetings, in which project team members facilitate informal discussions at different topic stations; and
- A social media strategy not only to build awareness of outreach events, but also to engage community members in an online dialogue about the OCFEC planning project. We have done this successfully in other communities where we used platforms such as Twitter, Facebook, Spotmojo, and Civinomics to create a conversation with diverse community members outside of the in-person engagement events.

TASK 3.2 – COMMUNITY STAKEHOLDER IDENTIFICATION

The Team will, in collaboration with the Client, identify a comprehensive and inclusive list of community stakeholders to engage in the iterative engagement process. (See 3.1 above.) Goal is to solicit wants and needs for the OCFEC and fosters a shared sense of authorship of the new Strategic Plan and Master Site Plan. Key to developing a widely supported approach will be establishing a process for clear, transparent and inclusive communication to the broader public/ community. Identified stakeholders, if appropriate, to invite for various outreach activities may include the following:

- Centennial Hall Foundation volunteers
- Site neighbors (e.g., Orange Coast Community College, Vanguard University, Davis Elementary School, Costa Mesa High School, local residents, local merchants)
- Animal breed and training societies
- Cultural events (e.g., Fiesta Del Charro)
- Service and activity societies (e.g., Orange County 4-H Club, Boy Scouts, Girl Scouts)
- Focused interest groups (e.g., California Native Plant Society, California Organic Gardening Club)
- Sports/activity groups, Professional and Amateur Motor/Cross Racers
- Advocacy groups (Big Brothers Big Sisters; California Coalition for Youth)
- Event organizers (e.g., World Class Shows, Extreme Sports Productions)
- Current/potential public and private sector partners (e.g., Chamber of Commerce, CVB)

TASK 3.3 – PREPARE REPORT DELIVERABLE

We will prepare a Community Outreach Report summarizing the input of the various four different public outreach efforts to the Executive Management Team and Master Site Plan Committee, and other Stakeholders, for feedback and discussion for utilization in overall planning.

Completion dates: Summary of Findings- April 10, 2017; Board of Directors Presentation—April 27, 2017

TASK 4 – DEFINITION AND EVALUATION OF OCFEC OPERATIONS AND NEEDS

This task will result in a full operational review for the existing fairgrounds and help inform the Team about prospective venue related uses in the future. The work will be led by Johnson Consulting, a firm that has extensive fairgrounds operating experience.

TASK 4.1 – STRATEGIC RECOMMENDATIONS FOR OPERATIONS

Based on the results of the previous work steps, while continuing to engage the various Stakeholders to assure their ongoing involvement in the planning process and that their needs are considered in any recommendations, we will:

- Assess the potential for OCFEC operations to be able to grow attendance and revenue, cover all of its own costs, and meet the needs of the venue’s various Stakeholders over the long term;
- Identify strategies, activities, and operational changes that can result in either cost savings or revenue enhancement in the short run, independent of decisions regarding a long-term master plan.

TASK 4.2 – PREPARE REPORT DELIVERABLE

We will prepare a memo summarizing the findings of our operations analysis with recommendations as applicable.

TASK 5 – VETTING OF BUSINESS OPPORTUNITIES

This task will produce a report containing a summary of independent business cases for future uses/ initiatives of the OCFEC based upon vetted business ideas, opportunities and findings. The Team’s work will stem from a thorough understanding of background data, community input, operational and facilities optimization, market demand, and the District’s guiding principles; thereby translating community-based programming and operational strategies into physical placemaking that serves the District for generations to come.

The planning process will include evaluation of local market demand to formulate and evaluate business opportunities/ ideas, alternative approaches to existing and/ or proposed uses, relationship of uses, phasing, and integration of existing activities.

TASK 5.1 – MARKET AND DEMAND ANALYSIS

The methodology we propose to **assess market demand and estimate overall performance for each** business sector is outlined below:

Market Demand and Supply Analysis We will analyze pertinent economic, demographic, and market factors that impact land use, business expansion, and space utilization within the area surrounding the site which could

contribute to overall planning opportunities. This analysis will focus on key economic and real estate issues such as market demand and supply conditions and includes a trade area analysis of retail/entertainment (not including fairgrounds), office, residential, and others. The goal is to provide a comprehensive understanding of market conditions for the overall site.

Estimated Market Performance Based upon our analysis of market demand and our recommendations outlined in the preceding work steps, we will address the market performance of the indicated uses. For each specific use, we will also profile operating expense information based upon information gathered and summarized in preceding tasks, as well as general information provided through industry resources and other credible secondary sources of information.

Cash Flow Analysis From the results of the estimated market performance of potential additional/ alternative business uses, which are the supporting mechanisms for pricing, performance, operating, and cost assumptions, we will prepare comprehensive **cash flow analysis**.

The demand profile, current cost structures, and data from existing operations as well as comparable facilities will be used to model the **operating revenues and expenses** of the proposed uses. Johnson Consulting has modeled numerous similar fairground facilities and will draw on its experience with these facilities. Projections will extend over a 10-year period.

Economic and Fiscal Impact Analysis Each aspect of the business model will be added to the market. The procedures for the Economic and Fiscal analysis are described in the specific task requested in the RFP in Task 9, below.

TASK 5.2 – JUSTIFICATION/ P&L FOR EACH BUSINESS CASE

We will work with the MSP Committee to develop a **justification analysis** for the District on the advantages and/or disadvantages of the OCFEC relative to certain uses. We will develop a **P&L and opportunities-and-constraints diagrams** based on information obtained and review of the various business case initiatives proposed.

TASK 5.3 – PREPARE REPORT DELIVERABLE

Based on the Market Demand Analysis, we will research and report on the opportunities/ideas for planning and future business case uses of the OCFEC, as well as constraints. The Business Case Report will include business cases for uses of whatever portion of the venue is not needed for the OC Fair, Centennial Farm, Pacific Amphitheatre, Imaginology, Heroes Hall, and the other anticipated current programmed events and community-based activities, and will include rough schematic drawings of at least three (3) possible alternative facility and/or land use configurations for possible business initiatives, including their relative strengths and weaknesses. It will be both qualitative and quantitative, providing approximate market value estimates for what alternative business use can generate as potential ground rent to the District, for the area considered for new initiatives.

TASK 6 – STRATEGIC PLAN DEVELOPMENT

TASK 6.1 – CONCEPTUAL PROGRAMMING & OPTION DIAGRAMS

The OCFEC Master Site Plan project calls for establishing a place to celebrate Orange County’s communities, interests, agriculture and heritage, with meaningful, cost effective outcomes that justify expenditure of resources. The process must look to future opportunities for education, technology and community interaction while remaining “grounded” in physical and budget realities.

Site programming and conceptual options will bridge the gap from stakeholder engagement to strategic planning. To that end, our team will prepare up to three conceptual options for site uses, integrating specific elements and upgrades garnered from outreach efforts. The options will describe theme-based scenarios for built facilities and outdoor spaces in the form of “bubble” diagrams, each including a brief written and statistical summary of proposed uses (including acreages and extents) and a rough assessment of costs/benefits. The concept diagrams can be used for the Options Workshop/Meetings described above.

The concept planning process will incorporate evaluation of local market demand to formulate and evaluate alternative approaches to uses, relationship of uses, phasing, and integration of existing activities. Specifically, the concepts will help to determine if market driven programs can be supported on-site, determine to what extent the program complies or derives from current zoning and land use requirements, and delineate how the project might be phased to mitigate cost of development and maximize return.

The concept diagrams will delineate the following:

- Definition of overall land uses.
- General location, density, character and extent of each potential land use.
- Reuse of existing Fair facilities and proposed new facilities.
- Vehicular circulation systems, major access points, and parking areas.
- Recreation, open space and natural resource relationships.
- Major community facilities including recreation and open space.
- Major planting areas and plant massing.
- Relationships to adjacent uses.
- Initial evaluation of environmental impacts, based on information derived from existing environmental review documents and studies
- Generalized statistical data on acreage, densities, yield, phasing.

TASK 6.2 - DRAFT STRATEGIC PLAN

The conceptual site programming and diagrams will support development of a Draft Strategic Plan. As the culmination of the previous tasks, workshops and stakeholder meetings and events, the plan will provide a guide focused to achieve OCFEC’s unique business goals and objectives - its Vision, Mission Statement, critical

success factors, strategies and actions for objectives, and a prioritized implementation timeline for both short-term and long-term growth and improvement opportunities.

As further refinement of the planning scenarios, the Plan will delineate OCFEC's needs within the plan's previously determined context, both internal and external, according to the District's long-term objectives, based upon the District's allocated resources where they will provide the most benefit, playing upon its strengths. A synthesis of the following issues will be instrumental to the Plan's success:

- Strategy for Specific High-Level Strategic Opportunities: Realistic, Implementable and Trackable
- Environmental Impact Criteria
- Financial Strategies - Cash Flow Based
- Policy Recommendations/ Milestones for Plan Priorities

TASK 6.3 – PREPARE REPORT DELIVERABLE

Working in conjunction with Executive Management, along with key Management Support, the Consulting Team will develop drafts, as needed, and a final three-year OCFEC Plan. The report will incorporate the concept diagrams and programs.

Completion dates: June 19, 2017; Board of Directors Presentation—June 29, 2017

TASK 7 – FINANCIAL PLAN & PROJECTIONS

This Task commenced in Task 5 and will be finalized in this Task (Task 7). It will consider the initial work done by all parties and will result in finalized financial projections, considering revenue, expenses and profit from each business element as well capital improvement assumptions prepared by HPI.

Based on the market data and demand projections, working closing with the Executive Management Team and the Audit Consultant, the Consulting Team will prepare a 10-year operating pro forma for the proposed OCFEC initiatives discussed in the previous tasks. The model will list all revenues and fixed and variable expenses in line-item detail throughout the period of the projection, and include data for each individual type of business use initiative.

The analysis will document OCFEC's approach to delivery of services, such as staffing, food and beverage, parking, and other major line items affecting the operation, thus providing the District with a clear understanding of how the initiative will earn and spend money, fit into the broader operations of the OCFEC, and what the expected financial picture will be at the end of each year. To the extent that public dollars are to be used to support operations, capital improvements, or other items, these sources will also be considered and integrated into the financial analysis.

We will also offer a specific discussion regarding revenue sources that are available to public assembly facilities, including benefactor naming rights and other specialized revenue streams, such as advertising, and based on market conditions.

The Team will outline potential funding sources that could be considered for the proposed OCFEC business initiative, as well as for ongoing operating support, that will consist of a detailed analysis for each option. These approaches may include private investments, incentives, sales, meals and room taxes, Tax Increment Finance

Districts, revenue bonds, empowerment/enterprise zones, tax-exempt bonds, and taxable bond revenue streams, among other tools.

TASK 8 – MASTER SITE PLAN DEVELOPMENT

This task will produce a Master Site Plan Report containing summary of key findings and initial recommendations for planning and future use of the Fairgrounds. Our recommendations will stem from a thorough understanding of background data, community input, operational and facilities optimization, market demand, and the OCFEC mission, thereby translating community-based programming and operational strategies into physical place-making that serves the County for generations to come.

The master site planning will include evaluation of local market demand to formulate and evaluate alternative approaches to uses, relationship of uses, phasing, and integration of existing activities.

The cohesive development of a comprehensive, data-driven, visionary MSP will be the culmination of the well-established fluid exchange of information (data) and ideas from the Internal and Community Stakeholders which will empower the 32nd District Agricultural Association’s Board of Directors to make the most informed decisions regarding the future of how OCFEC will fulfill its Mission Statement: “Celebration of Orange County’s Communities, Interests and Heritage.”

TASK 8.1 – MASTER SITE PLAN

Following the Options Workshop/Meetings, and based on additional input from internal and community stakeholders, we will prepare a Master Site Plan with initial recommendations for future use of the OCFEC site and facilities.

Our team’s approach to physical master planning will stem from an understanding of local conditions and an intimate relationship with the site, including topography, drainage, existing uses, relationship to surroundings, and the social context of human activities. It will incorporate sustainable, low impact development techniques that will allow a more intensified program of uses to “sit lightly” on the land. The master plan will be suitable as a basis for detailed site planning and entitlement processing to be conducted as part of a future contract.

The master planning process will translate community-based, evidence-driven programming and operational strategies into physical place-making. This will include alternative land use concepts that describe different approaches to uses, relationship of uses, phasing, and integration of existing activities.

- Establish zones for County Fair and other major events, active and passive open space, neighborhood and community destinations and recreation, and economic “drivers” including an optimized mix of new infill development.
- Integrate usable buildings and outdoor spaces that will provide efficiency and serve as high-functioning venues for community activities.
- Address site drainage through sustainable system integrated into the roadway and open space network.
- Incorporate sustainable landscape strategies and a multi-purpose open space system.
- Design for walkability and interconnected urban form and compact relationship of complementary uses.

- Create possibilities for a hierarchy of circulation, entry, identity, and image for key landmarks, with more private or support uses buffered and served by more minor roadways.

TASK 8.2 – PREPARE REPORT DELIVERABLES

The Consulting Team, in conjunction with the Executive Management Team and Key Management Support, and Master Site Plan Committee, will prepare drafts and a final fully documented 10-Year OCFEC Master Site Plan that addresses the best options for the District and addresses all of the key issues and planning process listed in your RFP. A presentation will be made to the full Board of Directors for review prior to implementation.

Completion dates: October 9, 2017;

Board of Directors Workshop—October 26, 2017;

Final Board of Directors Approval—November 16, 2017

TASK 9 – ECONOMIC AND FISCAL IMPACT ANALYSIS (OPTIONAL)

This Task commenced in Task 5 and will be finalized in this Task (Task 9). It will consider the initial work done by all parties and will result in finalized economic and fiscal impact analyses considering the developed business and masterplan. Our Impact approach is described below.

To the extent that state and local governments will be participating in the project, part of the return is measured in economic benefits of the project. For this project, it may be important to determine where impacts would occur, as this data can be used to advance the project through the public review and approvals process. It may also be helpful in obtaining final funding grants and ongoing operating support by communicating how the project can help drive demand to the area, how much employment will occur and how much tax revenue will be generated. As such, for this analysis, we will:

- Use the most recent ExPact survey, an excellent survey prepared by Destination Management Association International (DMAI, formerly known as the International Association of Convention and Visitors Bureaus), to estimate direct spending by attendees, associations, exhibitors, and the facility itself, adjusted for local market price indices.
- Identify from where attendance will likely originate.
- Indicate the volume of hotel room nights generated by the project.
- Identify where spending will most likely be captured.
- Use the IMPLAN model (an input-output model of the local economy) to estimate indirect and induced spending and employment impacts of the proposed facility for both the projected events and attendees in a stabilized year of operations, based upon the demand projections and the construction of the facility.

PROPOSAL AND ATTACHMENTS – TECHNICAL

Work Plan, Approach, Methodology, Availability

- Summarize local and state tax structures, including all relevant City, State, County, and other municipal taxes that may be appropriate.
- Project the facility’s impact on City revenue collections, which include retail sales, lodging, restaurants, and any other areas impacted by the project, and determine whether there will be any cannibalization of existing facilities.
- Analyze the impact of the one-time construction activity.

MEETINGS, COMMUNICATIONS, APPROVALS, SCHEDULE MANAGEMENT

Key to developing a widely supported OCFEC Strategic Plan and Master Site Plan will be establishing a defined process that enables clear, transparent and inclusive communication. Our Team’s initial efforts will include working with District Representatives to collaboratively define and document the structure (points of contact and protocols to ensure timely and effective communication), the process, milestones, and schedule for engagement with the OCFEC internal stakeholders, as well as a strategy for timely and appropriate engagement of and communication with the broader public/ community.

The single key to the coordination of the Team’s efforts depends on the strength of our management team who are primarily responsible for the delivery of our services to our Clients. Our management team and the systems that they employ will become an extension of the District’s forces and will coordinate the management of Client meetings, provide constant communications, monitor approvals and schedules to ensure that goals are met. As the primary day-to-day contact, Johnson Consulting will utilize their vast project management experience and understanding of local conditions to ensure a smooth and efficient work planning process.

UNDERSTANDING OF PROJECT OBJECTIVES

We understand that this project will play an important role in justifying the economic strategy for the OC Fair and Event Center (“OCFEC”) over the next decade. The District has envisioned that the OCFEC will continue to be a catalyst for the area’s economic stability. The mission focuses upon continuing to develop an environment that will spur creativity and innovation by capitalizing on the entertainment, educational and recreational site and human resources. The result will promote a culture with the ability to incubate nascent ideas into site advances that may spawn new civic facilities.

The key to this master site planning effort will be to translate the power of this idea into a built environment that will foster and promote this type of experience. Additionally, the project will also focus upon how the positive energy generated from the OCFEC may enhance the vitality of the surrounding community. The future plan must create opportunities for the OCFEC to enhance its role as a community gathering place by offering a supportive mix of uses and spaces that meet the public’s needs.

Board of Directors Agenda Report

MEETING DATE: SEPT. 22, 2016 ITEM NUMBER: 9G

SUBJECT: 32nd DAA Construction Management Options

DATE: September 16, 2016

FROM: Kathy Kramer, CEO

PRESENTATION BY: Kathy Kramer, CEO

RECOMMENDATION

Information item only.

BACKGROUND

The OCFEC Board of Directors instructed the Board Chair and CEO to meet with the Department of General Services (DGS) to investigate what construction management options were available to the Association in addition to California Fairs Financing Authority (CFFA) and DGS.

A meeting was held with DG S, Gonsalves and Son, OC FEC Board Chair Gerardo Mouet and OCFEC CEO Kathy Kramer in Sacramento on April 19, 2016 to discuss this issue.

On September 12, 2016, OCFEC was contacted by the DGS representative and provided the following information:

PCC §10108 provides, in relevant part, when the nature of the work to be performed by a DAA is such that DGS does not believe its services in connection therewith are required, DGS may authorize the DAA to carry out the project directly (i.e. delegate authority), regardless of the estimated project cost. DAAs are not exempt from PCC § 10108, they are exempt from the current \$656,000 (increased from the previous \$634,000 – statute calls for a periodic reassessment, and \$656,000 is the recent increase) project cost limitation identified in PCC §10108.

The other PCC §10108 provisions continue to apply to DAAs. e.g. DGS must continue to determine whether its services are necessary in order to carry out

the project; the DAA must solicit bids and award the work to the lowest responsible bidder if the work exceeds \$25,000; and the DAA cannot utilize day labor in excess of \$50,000.

I confirmed with the staff that receive and review these requests that DGS does not currently receive requests per this provision from DAAs. That may be because of unfamiliarity with the provisions, or as you noted, because CFFA provides a good deal. I'll send the DGS costs for review of PCC §10108 delegation as soon as I hear back.

Staff will continue to work with DGS to obtain costs associated with working directly with DGS if this option is exercised. Staff needs to confirm procedures on project development including contracting with architects, engineers and other consultants.

Additionally, staff will need to understand how the inspection process will work on State property, a function currently fulfilled by CFFA.

Board of Directors Agenda Report

MEETING DATE: SEPT. 22, 2016

ITEM NUMBER: 9H

SUBJECT: AB 1907, the anti-sale legislation, has been signed by Governor Brown

DATE: September 16, 2016

FROM: Kathy Kramer, CEO

PRESENTATION BY: Kathy Kramer, CEO

RECOMMENDATION

Information item only.

BACKGROUND

In 2009, then Governor Arnold Schwarzenegger proposed selling the fairgrounds to help shore up the State's budget during the recession. In 2011, a court blocked the proposed sale to a private group. The language allowing the State the ability to sell the fairgrounds remained in the legislation. Repealing this language was a priority for Fair Board members, staff and members of the public to ensure the fairgrounds would not be sold.

With the help of Gonsalves & Son, the Association's legislative representation, AB 1907 was authored and introduced by Assemblyman Tom Daly in February of this year.

On Monday, September 12, Governor Brown signed AB1907 removing the sale language from the legislation. This legislation will go into effect January 1, 2017.

It's a great day for the future of the OC Fair & Event Center. This legislation clears any doubt that has lingered and everyone can clearly focus on the future of the fairgrounds.
